

STARX[®]
FOR BOTANIC GARDENING

Starxgrow Nitrosol

Liquid Plant Food

Enriched with **Organic**
Blood & Bone

24 vital
ingredients

- Nitrosol Liquid Plant Food is organically enriched with blood and bone.
- Suitable for all indoor and outdoor plants.
- Promotes healthy growth in established plants as well as seedlings.
- Absorbed through the leaves as well as the soil.
- Enhances soil fertility by encouraging natural bacterial activity.

- Nitrosol is the ideal fertiliser for all garden and indoor plants. Nitrosol has been a favourite of local gardeners. Its unique formulation provides the benefits of blood and bone and natural growth stimulants in an easy to use liquid form.
- Nitrosol provides an effective balance of major and minor plant nutrients and minerals and can be absorbed through plant leaves as well as through the roots.
- Nitrosol enhances soil fertility by encouraging beneficial soil microorganisms.

Directions for Use. SHAKE WELL BEFORE USE.

Gardens

Mix 40ml of Nitrosol Concentrate in a watering can. (9-10 litres) Apply 1 watering can per square metre of soil area. Apply monthly during active growing periods.

Pots

Mix 40ml of Nitrosol Concentrate in a watering can. (9-10 litres) Water pots heavily with the Nitrosol solution until liquid starts to drain from the bottom of the pot. Apply monthly during active growing periods. Apply monthly at half strength during winter months.
