

DEFENDER SNAIL & SLUG PELLETS

GENERAL INSTRUCTIONS

DEFENDER SNAIL & SLUG PELLETS (Metaldehyde 5% Granular) kills snails and slugs by irreversibly destroying the mucus producing cells that are essential for movement. Where the attack is heavy it may be necessary to repeat the application. Best results are achieved by application during mild damp weather when slugs and snails are most active but when rain is not imminent. Snails need to be active to come into contact with the **DEFENDER SNAIL & SLUG PELLETS**.

TIMING: Apply **DEFENDER SNAIL & SLUG PELLETS** when crops are most vulnerable and when the pest is evident and active.

For other crops, time the application to protect the sensitive growth stage. For seedlings best results may be achieved by applying 5-10 days prior to planting.

DIRECTIONS FOR USE

Type of Garden	Pest	Rate	Critical Comments
Fruits, Vegetables & Ornamental Gardens	Snails and slugs	10g to 15g (1 teaspoon) per m ²	Broadcast evenly over the surface of the ground where snails and slugs are active, or incorporate with seed when direct drilling. Use low rate only when snail density is low. Use higher rate for moderate to high density infestations.
		5-10 pellets per 20cm pot	For best results place baits close to base of pot. Scatter evenly.
