

ORGANIC EARTHWORM CASTINGS

ORGANIC EARTHWORM CASTINGS are an organic form of fertilizer produced from earthworms. Also known as Vermicast, worm castings is essentially earthworm waste, otherwise known as worm manure / poo. As these creatures eat through compost, their waste creates an optimal soil enhancer.

ORGANIC EARTHWORM CASTINGS are excellent for plants. They contain all the essential nutrients that plants need in addition to enriching the soil in which the plants are grown. Not only can this fertilizer be used on nearly any type of plant, it can also be used directly on plants without burning them. Worm castings can be applied as top dressing, side dressing, or worked into the soil.

ORGANIC EARTHWORM CASTINGS have a broad and diverse biological load that generates the highest measurable "N" cycling potential for soil amendments. Quality control methodology is utilized to ensure consistency from batch to batch to offer you the best natural fertilizer possible.

ORGANIC EARTHWORM CASTINGS offers a wide variety of benefits to your soil and your plants including active biology that work with your plants and soil to help in a number of ways.

ORGANIC EARTHWORM CASTINGS are loaded with microbes, bacteria, fungi, amoeba, protozoa and nematodes. This natural life works in a symbiotic relationship with your plants to help break down nutrients, increase water retention, soil aeration and can help prevent disease.

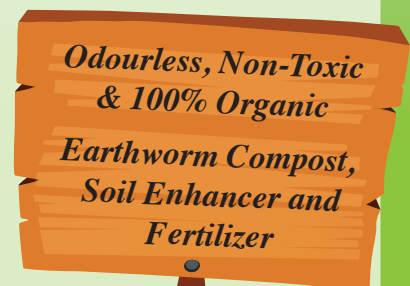

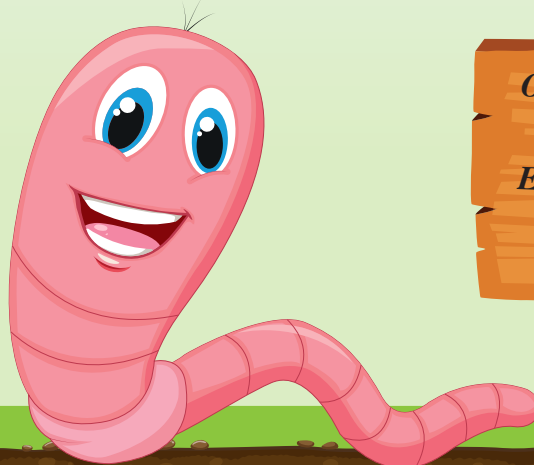

ORGANIC EARTHWORM CASTINGS humus also has the amazing ability to absorb toxins and harmful bacteria to help improve overall plant health.

ORGANIC EARTHWORM CASTINGS also consists a full spectrum of minerals and nutrients like potassium, nitrogen, magnesium, calcium, phosphorus, copper, zinc, cobalt, iron and carbon.

ORGANIC EARTHWORM CASTINGS offer a natural slow release of nutrients that sustain and feed your plants throughout the growing season, unlike chemical fertilizers where you see a burst of growth and then little after.

Crop:	Recommended Rate:
Herb	3 - 5 spoon per month
Potted Plant	4 - 6 spoon per month
Vegetable	300 - 500 g / m ²
Fruit Tree	3 - 4 kgs / tree
Mature Tree	5 - 6 kgs / tree

- Enhance and amend soil conditions in an organic and natural way for vigorous plant growths.
- All essential nutrients and trace-elements are in the most simple forms, hence plants can quickly and easily absorb it.
- Improve soil structure to optimum conditions for maximum aeration and water retention.
- Promote fibrous root system.
- Balance up soil's pH reading.
- Improve soil's Electrical Conductivity (EC).
- Improve the quality of the plant's yield.
- Improve plant's immunity system to against diseases.
