

STARXFOLIAR KELP PREMIUM SL

High Potassium Seaweed Extract

MACRONUTRIENTS:

8.0% Nitrogen (N) 1.15% NO₃-N
6.85% organic NH₂-N 4.3% Potassium K₂O

MICRONUTRIENTS:

3000 mg / kg B 6000 mg / kg Mn
1000 mg / kg Cu 6000 mg / kg Zn
3000 mg / kg Fe 0.05% mg / kg Mo

FURTHER INGREDIENTS:

10% Amino acids 0.8% Ash
9.5% Glycine Traces of vitamins & proteins

STARXFOLIAR KELP PREMIUM SL is a seaweed mineral fertilizer with the effect of plant growth stimulant based on the extract of natural phyto-hormones of growth designed for foliar application, fertigation systems, pre-treatment of seeds and seedlings soaking.

STARXFOLIAR KELP PREMIUM SL contains an extract of phyto-hormones Auxin and Cytokinin in a ratio 350:1 from seaweed Ecklonia Maxima. Due to the fact that the phyto-hormones Auxins predominate in the composition of the product, root development is stimulated, which increases the resistance of plants to the adverse soil and climatic conditions, improves uptake of nutrients.

STARXFOLIAR KELP PREMIUM SL – HOW DOES IT WORK?

The active development of the root system is stimulated due to the high concentration of Auxins. The synthesis of Cytokinins is enhanced simultaneously with the development of the root system, which provides an increase of ground plant mass.

FUNCTION AND EFFECT OF AUXINS IN PLANTS:

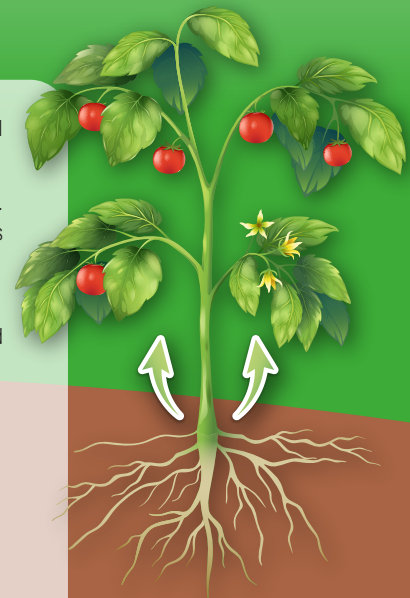

- Stimulating the growth of the root system
- Apical dominance
- Stimulation of flowering
- Expansion of cells and their plasticity
- Slowing the aging and leaf fall
- Fruit inception and growth

FUNCTION AND EFFECT OF CYTOKININS IN PLANTS:

- Cell division
- Development of leaf apparatus
- Stimulation the opening of stomata
- Growth of lateral buds
- Slowing down the leaves aging
- Fruit inception and growth

APPLICATION FREQUENCY: Apply once a week.

DIRECTIONS FOR USE: Shake well before use.
