

HYDROPONICS ALL-IN-ONE PLANT FOOD 2-1-6 is highly quality fertilizer for Drip Irrigation, NFT, and all types of Hydroponic Systems.

**HYDROPONICS ALL-IN-ONE PLANT FOOD 2-1-6** is an organic-based, natural and sustainable liquid fertilizer, making it ideal for hydro-organic gardeners and certified organic commercial food producers.

**HYDROPONICS ALL-IN-ONE PLANT FOOD 2-1-6** contain major plant nutrients (nitrogen, phosphorous and potassium), micronutrients and minerals, such as zinc and iron essential for vegetative plant growth and development.

**HYDROPONICS ALL-IN-ONE PLANT FOOD 2-1-6** contains a mild, non-burning form of seaweed. The low numbers in the N-P-K ratio are a clue that you can use it every time (as directed) without damage to your plants.

**HYDROPONICS ALL-IN-ONE PLANT FOOD 2-1-6** also makes a great foliar spray. Mix it according to directions, and mist your plants with it every 3 or 4 days. The solution requires no pH correction, and plants treated in this way will never develop a micro-nutrient deficiency, not to mention the faster growth rates.

## Tips:

- · For best results foliar spray once per week.
- · Foliar spraying works best when done in the early morning or early evening.

 Foliar feeding is highly effective because the nutrients are taken up by the leaf stomata which can help to correct localized deficiencies and increase uptake of nutrients.

## **Nutrient Content:**

Element	lonic form absorbed by plants	%
Nitrogen	Nitrate (NO₃⁻), Ammonium (NH₄⁺)	2.0%
Phosphorus	Dihydrogen phosphate (H <sub>2</sub> PO <sub>4</sub> -), Phosphate (PO <sub>4</sub> 3-), Monohydrogen phosphate (HPO <sub>4</sub> 2-)	1.0%
Potassium	Potassium (K+)	6.0%
Magnesium	Magnesium (Mg <sup>2+</sup> )	1.0%
Calcium	Calcium (Ca <sup>2+</sup> )	
Sulfur	Sulfate (SO <sub>4</sub> <sup>2-</sup> )	
Iron	Ferrous ion (Fe <sup>2+</sup> ), Ferric ion (Fe <sup>3+</sup> )	
Copper	Copper (Cu <sup>2+</sup> )	1.0%
Manganese	Manganese (Mn <sup>2+</sup> )	
Zinc	Zinc (Zn <sup>2+</sup> )	
Molybdenum	Molybdate (MoO <sub>4</sub> <sup>2-</sup> )	
Boron	Boric acid (H3BO3), Borate (H2BO3 <sup>-</sup> )	

Stages of Growth / Rate of Application ( per 10 Ltrs of Treatment Water )		
Cutting & Seedlings	15ml	
General Purpose / 1st Stage (Early Growth) Seed Germination	25ml	
2 <sup>nd</sup> Stage (Young Growth) Vegetative & Roots Growth	30ml - 35ml	
3 <sup>rd</sup> Stage (Adult Growth) Reproductive, Flowering & Fruit	35ml - 40ml
