

ALGAE CLEAN

STARX[®]
FOR BOTANIC GARDENING

Algaecide - Germicide - Disinfectant

| AREA | DISEASES CONTROLLED | APPLICATION | HOW TO APPLY |
|--|-----------------------|---|---|
| General Use | Algae and Mould | Shake well before spray | Do not rinse treated surfaces |
| Walls and floors: Tiles, concrete, benches, wall and walkways | Fungal Bacteria | Apply every 3 or 4 weeks interval | Use after pre-cleaning treatment with water |
| Golf course and bowling greens, bunkers and sports turf areas. Plant nurseries, Greenhouse & water treatment ponds | Viral Plant Pathogens | Outdoor: Spray after the wet weather or raining day | Spray onto affected area and allow to dry |

ALGAE-CLEAN is a selective turf and ornamental algaecide containing Quaternary Ammonium Compound.

ALGAE-CLEAN is a general greenhouse algaecide, germicide and disinfectant for control of fungal, bacteria, algae and viral plant pathogens.

ALGAE-CLEAN is ideal for commercial applications widely use in plant nurseries, live-stocks, water treatment ponds, greenhouses, golf course, bowling greens and sports turf areas, as well as on hard surfaces such as walkways, floors, benches and walls.

ALGAE-CLEAN is an environmentally safe, biodegradable, completely water soluble and non-phytotoxic algaecide. Used as directed, the pesticide residues of this product are biodegraded by normal soil micro-organism populations.

Advantages of ALGAE-CLEAN:

- Unique mode of action
- Limited potential for resistance
- Strong activity on algae, will control algae effectively and efficiently
- Very effective on algae control through irrigation systems
- Limited potential for burn, unlike other algaecides on the market
- Environmentally safe, biodegradable and completely water soluble and non-persistent in the environment
- Easy to use Non-corrosive to equipment, structures, growing areas and most importantly is not harmful to plants when applied at recommended rates
- Safe for use in nursery production situations on a range of plant species
- Credible formulation & proven activity
