

STARXMITÉ

STARXMITÉ (Active Ingredient: Amitraz) insecticide / miticide is intended for control of mites on ornamental plants.

STARXMITÉ provides excellent knock-down and residual control. A good evaluation of performance can generally be made 4 - 7 days after treatment.

STARX[®]
FOR BOTANIC GARDENING

Mode of Action

STARXMITÉ works primarily through contact action. Treat plants when pests are immature or at a susceptible stage and populations are building, before crop damage occurs.

Insecticide & Miticide

Treat and control over various species of pests including broad mite, european red mite, southern red mite, tumid mite, two-spotted spider mite, whitefly, silverleaf & greenhouse thrip.

Instructions

Spray directly onto pests, plants, stem and soil. Apply once every 4 days. Apply **STARXMITÉ** at first sign of insects / mites.

Keep out of reach of children

Keep out of reach of children. Avoid contact with eyes and skins. If irritation occurs, rinse thoroughly with clean water.
