

# STARXLE®

**STARX®**  
FOR BOTANIC GARDENING

**STARXLE® provides a new level of control for sucking insects commonly found in cacti and succulent plants**

**STARXLE®** (Active Ingredient : Dinotefuran) protects plants from insects such as leafhoppers, aphids, mealy bugs, leaf miners and from underground pests such as ants, termites, ground beetles, subterranean ants, etc.

**STARXLE®** is a highly-effective and environmentally-friendly insecticide for the control of common pests in succulent & cactus namely aphids, mealy bugs, spider mites, fungus gnats and scales.

**STARXLE®** is a root-uptake (systemic) insecticide which makes it the most suitable in killing insects hidden in plants and underground.

**DIRECTIONS FOR USE:**

Shake well before use.

**APPLICATION / DIRECTION :**

Ornamental Plants	Targeted Pests	Application Frequency
Cacti & Succulent Plants	Aphids Mealy Bugs	<u>Normal Period :</u> Apply once every two to three weeks (14 days to 21 days).
Roses	Spider Mites	<u>Infestation Period :</u> Apply once every 3 - 4 days for 3 treatment cycles.
