

BASTARXGRAN

WEED STOP FOR LAWNS

ACTIVE CONSTITUENTS: 400 g/L BENTAZONE
60 g/L MCPA

Kills Weed Roots

Won't Harm Lawns

Overnight Results

- ✓ Provides a cost-effective yellow nutsedge control program
- ✓ Effectively eliminates underground tubers
- ✓ Can be used in cool- and warm-season turfgrass, ornamentals, nurseries and along roadsides

BASTARXGRAN offers reliable, cost-effective post-emergent control of tough broadleaf weeds, yellow nutsedge and annual sedges.

BASTARXGRAN provide 100% weed control in Turfgrass & Ornamental.

Remarks: As a foliar herbicide, good coverage is essential. Application should be made to fully exposed weeds, prior to flowering. Best results will be achieved when application is made to actively growing young weeds.

Weeds Controlled:	
Anoda, Spurred, Annual Sedges, Burnweed	Mustard, Musk Thistle, Nutsedge Yellow
Balloonvine, Common Purslane	Purslane, Ragweed, Sesbania
Canada Thistle	Shepherd's pirse, Smartweed, Spurweed
Dayflower, Devil's-claw	Sunflower, Wild
Galinsoga, Groundsel	Wild Mustard
Ladysthumb, Lawn Burweed	Yellow Nutsedge
Application Frequency: Apply once every 2 months (or when tiny weeds exposed)	

Special Instructions: Do Not apply during windy conditions because spray drift may cause damage to adjacent ornamental plants. If possible, spray at low level is advisable.

Do Not apply **BASTARXGRAN** to turfgrass that has been under stress such as drought, cold temperature, or injury from other herbicides or pesticides.

For best control of broadleaf weeds, Do Not mow turfgrass within 3 days before or after application.

For best control of sedges, Do Not mow turfgrass within 5 days of application.
