

PYRETHRUM

Aphids

Caterpillar

Whiteflies

Pyrethrum (Active Ingredient : Pyrethrins) is a natural organic insecticide.

Pyrethrum controls aphids, blackflies, greenflies, caterpillars and whiteflies on fruit trees, vegetables and ornamental plants.

Pyrethrum can use on outdoors, in greenhouses and on pot plants throughout the season.

Pyrethrum can use on a range of edible crops and in ornamental plant production.

Pyrethrum must be stored in a suitable pesticide store away from strong sunlight.

Crops	Pests	Application Frequency
Fruit trees, Vegetables & Ornamental Plants	Aphids, blackflies, greenflies, caterpillars and whiteflies	Apply once a week

CROP SAFETY

Some species of plant may be sensitive to **Pyrethrum** and show signs of yellowing, particularly after a second application. Test spray on a small number of plants before spraying larger batches.

It is essential to achieve good spray coverage of the target crop foliage for optimum pest control.

DIRECTIONS FOR USE

- Do not water immediately after application
- Do not apply under hot sun
- Shake well before use
