PHYSAN PLUS® is a broad range disinfectant, fungicide, virucide, and algacide which effectively controls a wide variety of pathogens on hard surfaces and plants.

PHYSAN PLUS® effective applications include greenhouses, hard surfaces, lawn and turfgrass, seedlings and cut flowers, decorative fountains, pools and birdbaths, and plants.

PRODUCT FEATURES

- Broad spectrum disinfectant with wide variety of plant and surface applications
- Cost-effective liquid concentrate
- Approved for use directly on plants
- Environmentally friendly and biodegradable
- Gloves not required for use with diluted solution
- Excellent wetting agent
- Pleasant odor and does not discolor skin

APPLICATIONS

• ORCHIDS - ADULT PLANTS

Spray anytime disease other than rot is evident. Spray once per month as preventative maintenance.

Soak compost when fungus is evident.

*USE: 2 ml of **PHYSAN PLUS**® per 1L of water.*

• ORCHIDS - BOTRYTIS

During cool damp weather, spray plants, flowers and under benches at first sign of the spotting on flowers.

Normally weekly spray will greatly reduce or eliminate the botrytis spotting.

*USE: 1 ml of **PHYSAN PLUS**® per 1L of water.*

• ORCHIDS - Phalaenopsis - Pseudomanas Cattleyea (Crown Rot)

Spray plants weekly to assure solution getting around and in base of leaves.

*USE: 1 ml of **PHYSAN PLUS**® per 1L of water.*
