

STARXMEC

LEAF MINERS

RED SPIDER MITE

A broad spectrum insecticide / miticide.

A superior solution for control of mites in ornamentals and vegetables.

Controls leaf miners by killing larvae in existing mines.

STARXMEC (Active Ingredient: Abamectin) is refined by microbial fermentation and refined antibiotic insecticide and acaricide, which can effectively repel phytophagous mites, lepidoptera, homoptera and other pests.

STARXMEC is a new broad-spectrum, high-efficiency, low-toxic, pollution-free biological insecticide and acaricide, which attacks the nervous system of insects and mites, causing paralysis within hours.

STARXMEC should apply when first signs of infestation or as soon as the population reaches a threshold of 1-5 mites per leaf.

Control / Treat type of diseases:

Aphids	Leaf miners
Plutella xylostella	Red spider mite
Spider rust	Scale insects

Mode of action:

STARXMEC acts by blocking transmission of signals between nerve cells or between nerve and muscle cells.

Shortly after ingestion, the susceptible mites and insects become irreversibly paralysed and die within 3 to 4 days.

APPLICATION FREQUENCY: Apply once a week.

DIRECTION FOR USE: Shake well before use.

STARX PTE LTD UEN No. : 201526417D
