Extracts from cedar, cypress, pine and plantain.

### APPLICATION FREQUENCY

Apply once a week.

### Variegated Monstera Care Tips

**Tip 1 : Finding Your Own** The Variegated Monstera is very rare and can be incredibly hard to come by, and can be very expensive. The best option is to find a single leaf cutting and grow it yourself!

**Tip 2 : Choose The Right Pot** Once you have managed to get your plant, you want to make sure it has the best chance of thriving. For this, we recommend a self watering pot so that the plant has a consistent source of water and therefore can grow consistently.

**Tip 3 : Roots** Your roots will grow towards the water in the self watering pot, so it is important to check for growth so that you can move to a bigger pot when ready.

**Tip 4 : Care** Keep your Monstera in its best state by spraying a fine mist of HB-101<sup>®</sup> Great for Monstera Ready to Spray over its foliage once a week.
