STARXCOTE CACTI & SUCCULENT CONTROLLED RELEASE FERTILIZER is a carefully balanced formula with lower nitrogen and increased potassium for steady growth and flowering of your cacti and succulents. The smart way to fertilize - one application feeds continuously for up to 3 months.

FEATURES

- The release of nutrients depends on temperature - more when it's warm and plants are growing and less when it's cold and growth is slow.
- **STARXCOTE** uses advanced prill technology that ensures even and controlled nutrient release with no wastage.
- Controlled release means feeding less often and more effectively; less frequent feeding is more economical and environment-friendly.
- Lower nitrogen and increased potassium to promote steady growth and flowering and improve resistance to pests and disease.
